

Historical Display

Proposed Areas:

Display Cases: Traditional Display Cases, with stained hardwood base and toppers, glass shelves and a velcro conducive backer. The stain would match your current wood tones. The Base contains two raised cabinet doors that open up to storage. A lock could be placed on cases if needed. The four cases on the east wall would use the current recessed lighting fixtures to illuminate the cases as well as provide a subtle glow as shown in rendering 4,5.

AGR Timeline: A place to display the fraternities history up to present day. Made out of 1/4" Vutecs prints surface mounted with 45 degree cleats, which allows for easy removal and installation. The graphics on rendering are not final prints they are just representations of what could go in the space.

AGR Values: Traditional Display with a 32" monitor recessed into a corner panel. Vutec prints display logo as well as AGR Values and Goals.
